

BloodTrack Hemosafe

Blood available anywhere in less than 60 seconds!

Allow the world's most advanced blood management system to quickly and securely provide blood anywhere in your hospital.

What does BloodTrack Hemosafe do?

1. Load Hemosafe's 150 individual compartments with allocated or unallocated blood units.
2. When blood is needed, identify the patient using a barcoded pickup slip or the integrated touch-screen.
3. Let Hemosafe select and dispense the most appropriate unit for the patient, even allocating the unit on demand.

What are the benefits of BloodTrack Hemosafe?

- Reduces the time taken to provide blood to patients
- Increases safety by limiting access to only the correct blood unit
- Eliminates unnecessary allocating and labeling of blood units
- Reduces overall blood inventory by reducing the number of pre-allocated units
- Reduces the number of journeys each blood bag makes between the blood bank and remote refrigerators
- Reduces blood usage since blood is only used when actually required
- Improves the overall management of blood stocks
- Provides allocated blood to remote locations 24/7 even when a blood bank technician is not available
- Reduces the chance of blood unit expiry
